Mobile app

Project store

Pedro Silva 71391

Welcome to our cutting-edge app, created to transform how companies run in the modern digital world. Our technology has been painstakingly designed to create and improve virtual stores, making sales transactions easy and encouraging deep connections with clients. Our goal is to maximize financial resources, reduce time, and simplify procedures for both consumers and businesses by utilizing the internet. Come along with us as we set out to reinvent the shopping experience in the hectic world of today.

Screen 1: Login. Here, the user can enter their username and password and save it to log in to the program once more.
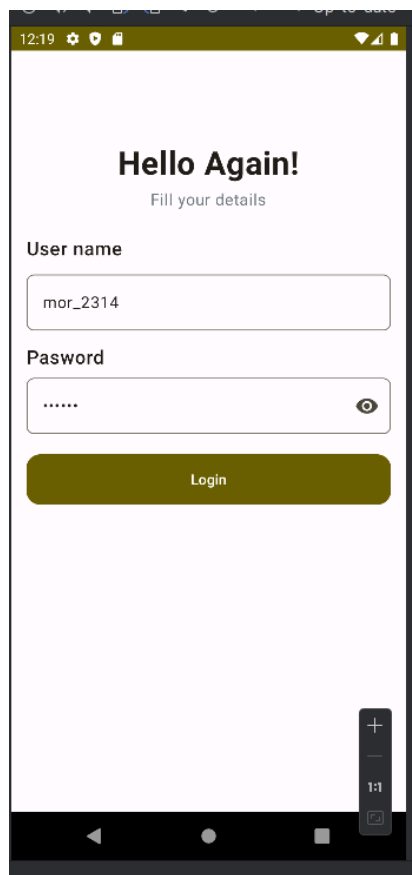

Screen 2: Here, customers can view and interact with things that they can purchase.

screen 3: is your own product showcase. Customers can carefully examine the products they have chosen on this screen to make sure they fulfil all their requirements.
 Screen 4: Here, customers can browse products based on categories and select just one product category, such as jewellery, from which related products only show up on the screen.

Screen 5: Order Hub for You. Customers can examine a detailed summary of their purchases, including product details and quantities, on this screen. Here, they may easily check out by selecting from a number of payment options, such as credit card and other practical ways.

Finally, I would like to draw attention to a significant obstacle that we faced during the app development process. Unfortunately, Firebase connectivity problems meant that simulated data had to be used for the login feature. Since I was the only person who created this application, getting beyond this barrier was a significant challenge. Still, I was determined to maintain the integrity of the software and the user experience.
